## Merit Intelligence – for better decision making

Merit Intelligence is our concept for giving our customers the tools and competence they need for making the right decisions. With Merit Intelligence you are able to provide your employees and management with correct information at all times, making them able to uncover discrepancies instantaneously.

Merit Intelligence is not only the right software for efficient business decision support. It is a complete offering to provide our customers with the right tools, the right competence and qualified services. Our Business Intelligence experts in Merit have provided our customers with tools and competence for more than a decade. Based on standard data models and reports, combined with extensive business knowhow we are able to meet your requirements in the best way.

### A complete product

- Efficient ETL tool and data warehouse with data models for all process areas
- Handling large data and transaction volumes
