Merit Supply Chain Execution

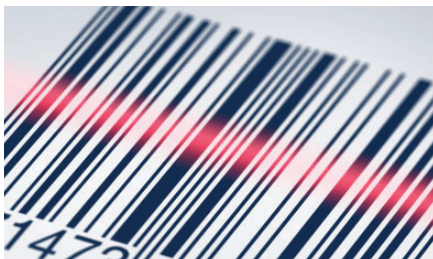

Is your warehouse efficiency and inventory accuracy good enough?

With Merit Supply Chain Execution, you can improve productivity and reporting quality both inside and outside your warehouse. Merit Supply Chain Execution is designed to utilize mobile devices and barcode scanning. It supports the business logic defined in your ERP system and works in real time to ensure that you always have updated information.

Merit Supply Chain Execution is designed with focus on distribution and manufacturing companies supporting the work processes in your supply chain inside and outside your own premises. It supports logistic processes like goods receiving, distribution orders, physical inventory, stock movement, pick list reporting and dispatch.

Merit Supply Chain Execution is designed by product specialist with extensive business knowledge and experience. It is used by a large number of satisfied users in several countries.

- Simplifying and optimizing work processes
- Improve efficiency and quality
- Easy access to businesscritical data
- Real time interface with Infor M3
- Browser or client based user interface
- Barcode scanning including support for GS1-128
- Interface with voice/speech recognition systems

Merit is a leading provider of business solutions in Northern and Central Europe.

We provide increased competitiveness to our customers, through state-of-the-art integrated standard software. Through knowledge and experience, Merit translates information into relevant knowledge for your business.
